FIRE ALARM PERMIT SUBMITTAL REQUIREMENTS

A fire alarm permit is required for the installation, addition or modification of any fire alarm system. Alarm systems shall comply with the International Fire Code and NFPA 72 or other applicable standards.

Submit **3** sets of plans and **one** set of battery/voltage drop calculations and manufacturer's data sheets for components of the system for review by the Fire Prevention Office.

Plans shall provide the following information:

- Business/Location Name and Street Address
- Property Owner/Rep Name and Contact Information
- Installation Contractor Contact Information and applicable License numbers
- Monitoring Company Contact Information and applicable License numbers
- Scale, date of plans, any revision dates, point of compass, designer information including minimum NICET Level III certification information and stamp
- Occupancy Classification(s), Building Construction Type and Hazard Type
- Square footage of project area
- All devices and appliances (detectors, pull stations, control panel, annunciators etc.)
- System Type (Class A, B, addressable, analog, local, proprietary, etc.)
- Battery/voltage drop calculations
- Manufacturer's data sheets and compatibility listings
- Operating instructions for the system (Copy of what will be posted at the FACP).
- Plans shall include floor plan of entire building, location and spacing of all detectors and notification devices, wiring legend and symbol list.
- Include full height cross-section and elevations. Include ceiling construction.
